

Eastman animal nutrition

Transforming insights into solutions

Innovation in **animal nutrition**

The animal production industry is continually evolving, and so are your needs. Persistent foodborne pathogens, new legislation, and changes in consumer preferences mean you need an innovative partner.

At Eastman, we are committed to investing in biochemistry, research, and service capabilities to remain an innovative provider of sustainable gut health as well as preservation and hygiene solutions.

Decision makers can leverage our unique backward-integrated model that allows Eastman to develop customized programs using in-house produced raw ingredients, helping you feed the world.

TOGETHER,
we customize
programs to optimize
**ANIMAL
PERFORMANCE.**

The portfolio

Choose from our broad feed additive portfolio to support your animal health needs.

Acidification

- **Eastman Acitra™ feed-delivered acidifier blends:** mixtures of organic acids and derivatives designed to acidify the feed, stomach, and crop

Gut health

- **Eastman Entero-Nova™:** blends of glycerides of fatty acids

Nutritional

- **Eastman Choline Chloride:** source of liquid choline to meet nutritional requirements

Preservation and hygiene

- **Eastman Keitex™ feed hygiene enhancer:** organic acid blends designed to enhance the preservation and hygiene of feed ingredients

Eastman is committed to **sustainability.**

Driven by more than 100 years of continuous innovation, Eastman is bringing sustainable materials to market and delivering financial value to our shareholders while scaling positive societal impact for our stakeholders.

Our innovations are driven with a specific goal in mind: to solve the world's greatest challenges by creating the most sustainable materials. Our strategy for that is founded in our commitment to the principles of the United Nations Global Compact, where our purpose, leadership, and actions continue to guide us toward **carbon neutrality, circularity, and caring for society.**

Eastman's moral purpose is to enhance the quality of life in a material way. In feeding a growing population, animal protein continues to play an important role in caring for society by addressing hunger and the good health and well-being of humanity. Sustainable food systems will require innovative approaches to enhance animal welfare and resource utilization while improving circularity and reducing the environmental impact of agriculture.

This is just the beginning. We will continue partnerships within the global supply chain to advance sustainable solutions and address the world's big challenges.

A shared mission and innovative spirit

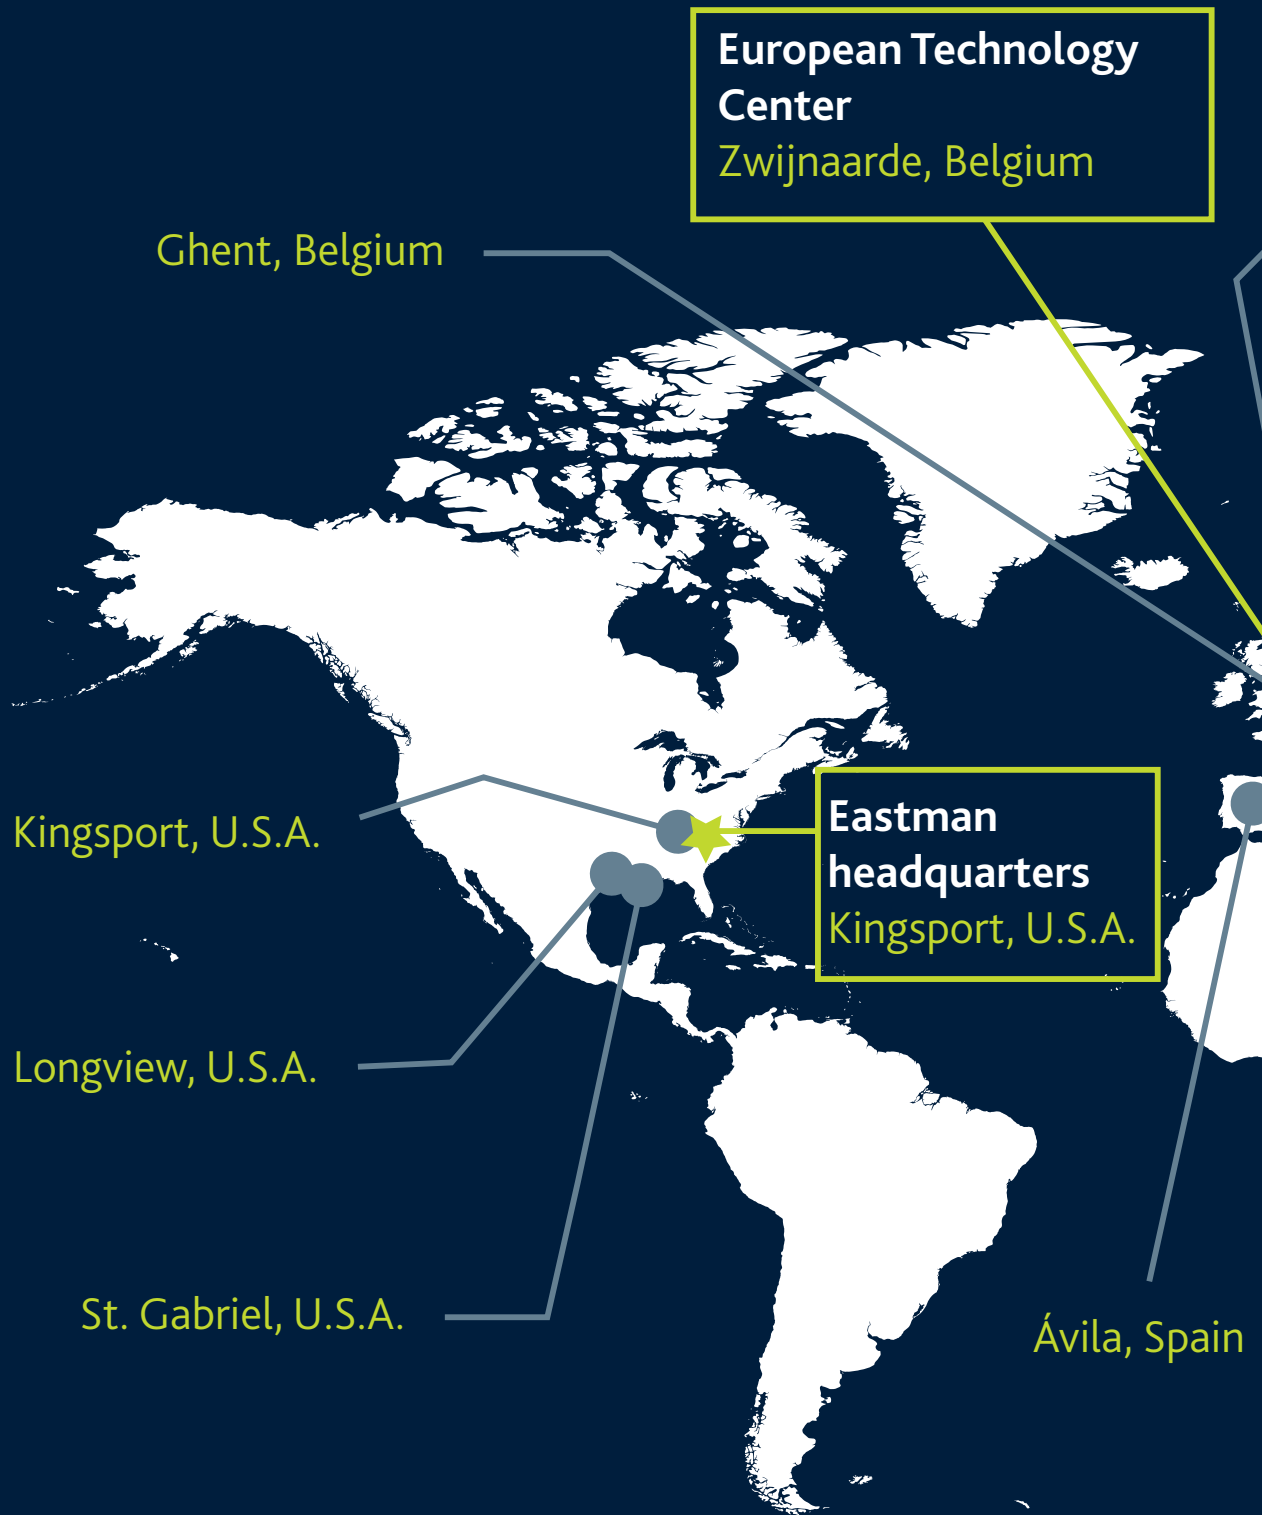

Change is constant in the animal nutrition industry. In a field that is constantly evolving, it is good to have an innovative partner you can trust. Eastman's regional teams work with customized additive programs to match regional needs and help you make the right decisions.

Let our experts assist you in finding the right program to fit your needs. By combining our unique manufacturing back-integrated model with our biochemistry expertise, we offer the best solution at the right time.

In an ever-changing
INDUSTRY,
the one thing you need
in constant supply is
PARTNERSHIP.
