Tritan™ Renew

Elevate the sustainability of your drink pitchers.

Filter out poor quality, and pour into Renew.

Eastman Tritan™ Renew copolyester is the trusted solution for pitchers that exceeds performance expectations without compromising design aesthetics, so brands can bring more of the most innovative products to consumers with 50% certified recycled content.*

Clarity — Serving libations has never looked so good. Tritan Renew creates pitchers that dazzle with glasslike clarity and gloss that feels as beautiful as it looks.

Durability — Tritan Renew is nearly unbreakable, shatter resistant and stands up to daily use.

Lightweight — Full pitcher? No problem. Tritan Renew is lighter than glass, so pouring is easy.

Dishwasher safe — Through repeated dishwasher cycles, Tritan Renew maintains its clarity and durability.

Food-contact ready — Our materials are free of all bisphenols, including BPA and BPS.

Odor and taste resistant — Unlike traditional pitchers, pitchers made with Tritan Renew prevent water, juice or wine from taking on plastic odors and tastes over extended storage time.

Total performance — While some alternatives perform well in some areas, pitchers made with Tritan Renew offer all-around excellence.

Good for you and the planet

This remarkable copolyester is made possible by Eastman's molecular recycling technology that transforms plastic waste into durable materials. This process breaks down hard-to-recycle plastic into its basic molecular building blocks, which allows plastic to be recycled again and again without degrading in quality.

Tritan Renew provides our manufacturing partners with a material made of 50% certified recycled content,* offsetting the use of fossil fuels and lowering greenhouse gas emissions.

*Recycled content is certified through ISCC mass balance allocation.
